Here is another design we made for [Trikkas initial 44](#). The “Lift Lamp” is adjustable in many dimensions.

A couple of color studies:

Here is how it works:

It allows a lot of adjustment. The hook is attached with and moved on a strap. The hook holds the bulb holder. The bottom part can be attached with a clamp or bolted on to a table, a stand or even the wall (the wall also works with a [simple hook](#).)

The key to this is the [set collar rail part](#) next to [the strap](#) on the top of course.
